

## Genset

|                 |              |
|-----------------|--------------|
| Model           | JHP-14GF     |
| Voltage         | 277/480V     |
| Frequency&Speed | 60HZ;1800RPM |
| Prime Power     | 14kW/18kVA   |
| Standby Power   | 16kW/20kVA   |

### Basic technical data

|   |                     |
|---|---------------------|
| Number of cylinders                             | 3                   |
| Cylinder arrangement                            | Vertical in-line    |
| Cycle   | 4 stroke            |
| Induction system                                | Naturally aspirated |
| Compression ratio                               | 22.5:1              |
| Bore  | 84 mm               |
| Stroke  | 90 mm               |
| Displacement                                    | 1.496 litres        |
| Direction of rotation when viewed from flywheel | Anticlockwise       |
| Firing order                                    | 1, 2, 3             |

### Weight of ElectropaK

|                 |        |
|-----------------|--------|
| Dry (estimated) | 197 kg |
| Wet (estimated) | 215 kg |

### Overall dimensions of ElectropaK

|        |        |
|--------|--------|
| Height | 793 mm |
| Length | 820 mm |
| Width  | 469 mm |

### Centre of gravity

|                            |        |
|----------------------------|--------|
| Forward from rear of block | 139 mm |
| Above centre line of block | 67 mm  |

### Moments of inertia

|                              |                       |
|------------------------------|-----------------------|
| Engine rotational components | 0.45 kgm <sup>2</sup> |
| Flywheel                     | 2.01 kgm <sup>2</sup> |

### Cyclic irregularity for engine standby power

|         |     |
|---------|-----|
| At 110% | TBA |
|---------|-----|

➤ **Engine: Perkins 403A-15G2**

➤ **Alternator: Stamford/Leroy Somer**  
**/Hengsheng**

➤ **Controller: DeepSea/SmartGen**  
**/DEIF/ComAp**

### Ratings

|   |         |
|---|---------|
| Steady state speed stability at constant load | ± 0.75% |
|---|---------|

### Performance

|   |            |
|---|------------|
| Average sound pressure level for bare engine (without inlet and exhaust) at 1 metre | 76.7 dB(A) |
|---|------------|

**Note:** All data based on operation to ISO 3046/1:2002 standard reference conditions.

**Note:** For engines operating in ambient conditions other than the standard reference conditions stated below, a suitable derate must be applied

**Note:** Derate tables for increased ambient temperature and/or altitude are available, please contact Perkins Applications Department.

### Test conditions

|  |          |
|--|----------|
| Air temperature                                  | 25°C     |
| Barometric pressure                              | 100 kPa  |
| Relative humidity                                | 31.5%    |
| Air inlet restriction at maximum power (nominal) | 3 kPa    |
| Exhaust back pressure at maximum power (nominal) | 10.2 kPa |
| Fuel temperature (inlet pump)                    | 40°C     |
| All ratings certified to within                  | ± 5%     |

## General installation, 403A-15G2 ElectropaK @ 1800 rpm

| Designation   | Units               | Type of operation and application |                      |
|---|---------------------|-----------------------------------|----------------------|
|   |                     | Prime power (60Hz)                | Standby power (60Hz) |
| Gross engine power                                    | kWb                 | 16.33                             | 17.96                |
| Gross BMEP  | kPa                 | 728                               | 800                  |
| Mean piston speed                                     | m/s                 | 5.4                               |                      |
| ElectropaK nett engine power                          | kW                  | 16.1                              | 17.77                |
| Engine coolant flow against 35 kPa restriction        | litres/min          | 55.2                              |                      |
| Combustion air flow                                   | m <sup>3</sup> /min | 1.2                               | TBA                  |
| Exhaust gas flow (max.) at atmospheric pressure       | m <sup>3</sup> /min | 2.6                               | TBA                  |
| Exhaust gas temperature (max.)                        | °C                  | 480                               | 590                  |
| Overall thermal efficiency                            | %                   | 33.04                             | 33.10                |
| Typical Generator sets electrical output (0.8pf 25°C) | kVb                 | 14.01                             | 15.62                |
|   | kVA                 | 17.51                             | 19.52                |
| Assumed alternator efficiency                         | %                   | 87                                |                      |

## Cooling system

Recommended coolant: 50% anti freeze / 50% water.

For details of recommended coolant specifications, please refer to the Operation and Maintenance Manual (OMM) for this engine model.

### Total coolant capacity

|  |            |
|--|------------|
| ElectropaK (with radiator) .....                     | 6.0 litres |
| ElectropaK (without radiator) .....                  | 2.6 litres |
| Maximum top tank temperature .....                   | 112°C      |
| Maximum static pressure head on pump .....           | 30.4 kPa   |
| Temperature rise across engine .....                 | 5.1°C      |
| Maximum permissible external system resistance ..... | TBA kPa    |
| Thermostat operation range .....                     | 82 - 95°C  |

### Radiator

|  |                          |
|--|--------------------------|
| Radiator face area .....                 | 0.167 m <sup>2</sup>     |
| Material and number of rows .....        | Aluminium, 2 rows        |
| Material and fins per inch .....         | Aluminium, 4.5 fins/inch |
| Width of matrix .....                    | 334.2 mm                 |
| Height of matrix .....                   | 500 mm                   |
| Pressure cap setting .....               | 90 kPa                   |
| Estimated cooling air flow reserve ..... | 0.125 kPa                |

### Fan

|                              |                        |
|------------------------------|------------------------|
| Type .....                   | Pusher                 |
| Diameter .....               | 320 mm                 |
| Number of blades .....       | 6                      |
| Material .....               | Plastic                |
| Drive ratio .....            | 1.25:1                 |
| Airflow at rated speed ..... | 49 m <sup>3</sup> /min |

| Duct allowance - Maximum additional restriction to cooling airflow and resultant minimum airflow |                     |                     |
|--|---------------------|---------------------|
| Ambient clearance 50% Glycol   | Duct allowance (Pa) | m <sup>3</sup> /sec |
| 53°C   | 65                  | 48.6                |
| 46°C   | 125                 | 48.6                |

## Fuel system

|   |                              |
|---|------------------------------|
| Type of injection .....                           | Indirect injection           |
| Fuel injection pump .....                         | Cassette type                |
| Fuel injector .....                               | Pintle nozzle                |
| Nozzle opening pressure .....                     | 14.7 MPa                     |
| Maximum particle size .....                       | 25 microns                   |
| Fuel lift pump type .....                         | Mechanical (camshaft driven) |
| Flow/hour .....                                   | 63 litres/hr                 |
| Pressure .....                                    | 10 kPa                       |
| Maximum suction head .....                        | 0.8 m                        |
| Maximum static pressure head .....                | 3.0v m                       |
| Maximum fuel temperature at lift pump inlet ..... | 40°C                         |
| Maximum fuel filter service interval .....        | 1000 hrs                     |
| Governor type .....                               | Mechanical                   |
| Speed control conforms to .....                   | G2                           |

### Fuel specification

|                          |                 |
|--------------------------|-----------------|
| USAFed Off Highway ..... | EPA2D 89.330-96 |
| Europe Off Highway ..... | CEC RF-06-99    |

**Note:** For further information on fuel specifications and restrictions, refer to the OMM fuels section for this engine model.

### Fuel consumption

| Power rating % | 18 kW/1800 rpm |           |
|----------------|----------------|-----------|
|                | g/kWh          | litres/hr |
| 25             | 375            | 1.55      |
| 50             | 272            | 2.25      |
| 75             | 250            | 3.10      |
| 100            | 261            | 4.32      |
| 110            | 282            | 5.12      |

## Cold start recommendations

### Minimum cranking speed @ 1800 rpm

| Minimum starting temperature | Grade of engine lubricating oil | Battery specifications  |                            |                              |                             |
|------------------------------|---------------------------------|-------------------------|----------------------------|------------------------------|-----------------------------|
|                              |                                 | BS39 11 Cold start amps | SAEJ537 Cold cranking amps | Number of batteries required | Commercial reference number |
| 0°C                          | 20W                             | 420                     | 590                        | 1                            | 72                          |
| -15°C                        | 10W                             | 420                     | 590                        | 1                            | 72                          |
| -20°C                        | 5W                              | 540                     | 740                        | 1                            | 647                         |

## Alternator

|                      |   |
|----------------------|---|
| Pole No.             | 4-Pole                                  |
| Exciter Type         | Single bearing, Brushless, Self-excited |
| Power factor         | 0.8                                     |
| Voltage adjust range | ≅ 5%                                    |
| Insulation Grade     | H                                       |
| Protection Grade     | IP23/22                                 |
| Phase / wire         | 3 phase 4 wires                         |

- ✧ NEMAMG1.JIANGHAO,and ANSI standards compliance for temperature rise and motor starting.
- ✧ Sustained short-circuit current of up to 300% of the rated current for up to 10 seconds.
- ✧ Sustained short-circuit current enabling down stream circuit breakers to trip without collapsing the generator field.
- ✧ Self-ventilated and dripproof construction.
- ✧ Superior voltage waveform from two-thirds pitch windings and skewed stator.
- ✧ Digital solid-state.volts-per-hertz voltage regulator with+1% no-load to full-load regulation.

## Control Panel

### The control module gives digital readouts of:

Generator voltage;  
Output frequency;  
Engine speed;  
Battery voltage;  
Engine hours run.

The **control panel** is an Digital Control Module suitable for a wide variety of single, diesel or gas, gen-set applications.

Monitoring an extensive number of engine parameters, the module will display warnings, shutdown and engine status information on the back-lit LCD screen and illuminated LEDs.

### The control module has indicators for failure information:

Over speed/Low speed,  
Emergency stop  
Low oil pressure;  
High water temperature  
Failure to start  
Battery charger failure

Dimension:1250\*700\*1100mm  
Weight:350kg

### Automatic shutdown occurs under:

Low engine oil pressure;  
High engine water temperature;  
Over speed/Low speed;  
Failure to start after three attempts.

### Electrical system

- Maintenance-free and anti-explosion battery
- Standard breaker
- ABB breaker (optional)
- ATS (optional)
- Battery charger (optional)
- GMS monitoring (optional)

Dimension:2200\*1000\*1550mm  
Weight:900kg  
Fuel Tank Capacity:180L

### Packing

- Wrapping film packaging
- Tray packaging
- plywood box packaging
